

Enzyme activity data-based worksheet

SAMPLE PLACEHOLDER replace with your own worksheet.

A student investigates the effect of temperature on the rate of an enzyme-catalysed reaction. Results:

Temperature / C : 10 20 30 40 50 60 70

Rate / a.u. : 8 17 29 41 38 19 3

1. Plot these results as a suitable graph and describe the trend.
2. Explain the shape of the curve between 10 C and 40 C.
3. Explain the shape of the curve above 50 C, using the term 'denaturation'.
4. State one variable that must be controlled in this investigation and explain why it must be controlled.
